

MSIP 2013

Medical Scientist Internship Program

Program Dates: Monday, June 24, 2013 - Friday, August 02, 2013

Application Deadline: Sunday, April 14, 2013

The Medical Scientist Internship Program (MSIP) is a 6-week summer program designed to expose high school students to the healthcare and the research component of medicine. Interns are challenged through clinical shadowing opportunities, lectures from medical professionals, and researching with a laboratory mentor. MSIP encourages applications from women, low-income families, underrepresented minorities, disadvantaged students, and students who live outside the Richmond area. Preference is given to students who would contribute to the recruitment of a diverse background of talented students.

Program Benefits

- Hands on experience in a research projects
- Shadowing various specialties in the medical profession
- Lectures from medical professionals
- College and career preparation
- Building connections with mentors in research and healthcare
- Developing skills in verbal and written communication
- Sharing the internship experience with other motivated high school students
